Summary

Java Full Stack Developer with 3.9 years of experience in designing developing and implementing web application and database solutions using Java, Spring Boot and React.js. Committed to continuous learning and passionate about applying innovative solutions to complex challenges.

Experience

Infosys ltd – Client: American Express ([American Express](#) 🔗)

Bangalore, IN

Java Full Stack Developer

July 2026 – Present

- Developed responsive **React** frontend interfaces and integrated **Backend APIs** for the **Prepaid team** to manage card loss claims and refund workflows.
- Boosted development speed and code coverage by integrating **GitHub Copilot** and **Claude for AI-assisted** pair programming, unit testing, and code optimization.
- Utilized **GitHub Actions** for managing deployments and executing existing **CI/CD pipelines**.

HCL Technologies ltd – Client: Deutsche Bank ([Deutsche Bank](#) 🔗)

Bangalore, IN

Java Full Stack Developer

February 2025 – February 2026

- Worked on **PoSys**, a **bond-tracking web application**; handling application onboarding through **JIRA** creation, Documentation and process tracking.
- Developed responsive and reusable UI components using **React.js**, **hooks**, and functional components and **integrated REST APIs** with backend services.
- Handled **BNES** application **deployments**, performed **Java upgrades**, updated **JDK** and **Tomcat** version while remediating 100+ security vulnerabilities to ensure compliance and stability.
- Maintained high code quality through **unit testing** and actively resolved **bugs** to ensure application stability.

Estuate Software pvt ltd.— Estuate Apps ([Estuate](#) 🔗)

Bangalore, IN

Java Full Stack Developer

August 2022—February 2025

- This is the role-based **web application** having multiple modules like **Employee portal**, **Leave**, **Timesheet**, **Expenses Management** and Others. It helps user to enter the Timesheet, Leaves, WFH, Expenses, Personal details etc.
- Designed and implemented **Restful APIs** to retrieve and update data from a **MySQL database**, optimizing data interaction and improving user experience with faster and more reliable data access.
- Involved in designing the application's **React.js** code using **Material-UI** and migrating the code from class components to functional components, improving maintainability and performance.
- Implemented custom **email triggers** for user actions such as time sheet approvals/rejections, onboarding and off-boarding, enhancing communication and reducing the need for manual intervention, thereby increasing overall operational efficiency by 20%.
- Enhanced UX and **API interactions** across application flows, **reporting**, and **user dashboards**.
- Created data-driven visual **dashboards**, **reports** and **metric**

Technical Skills

Language & Frameworks: Core Java, SQL, Spring Data JPA, SpringBoot, Hibernate, JavaScript, Microservices

Dev Tools & Technologies: GitLab, Bitbucket, SonarQube, Jira, Postman, WinSCP, Eclipse, VS Code.

Libraries: React.js, Material-UI, Log4J, Swagger, JUnit.

Databases: RDBMS, Oracle DB, MySQL, Postgres.

Additional Skills: Linux, AWS, Docker, Kubernetes, Kafka, Redis, System Design, DSA, Agile.

Education

Bachelor of Engineering from Dr. Ambedkar Institute of Technology Bengaluru. [2018-2022].
